

# Refrigeración Haief Congelación

## **Typical Installation and Application**

Suitable for clinical, medical, scientific research, quarantine and other departments to store items under low temperature conditions. Applicable for universities, hospitals, disease prevention and control centres, blood stations, scientific research institutes, electronics and chemical enterprise laboratories and biomedical engineering research institutes. For storage of biological products and sample biological samples such as red and white blood cells, viruses, bone and bacteria. Also used for electronic devices and other materials used for cryogenic tests.

# Energy Efficient, Safe and Reliable

High efficiency HC refrigeration system, optimised for energy efficiency delivering a power consumption figure of just 5.5kW/24hr.

810mm cabinet height makes it easy to place on or under bench, saving storage space. Stackable design.

### Ergonomic design

Ergonomic handle design ensures easy one-hand door opening.

Optimized noise reduction cabinet and system design, nits sound level of only 46,8dB.

# **Product Features**

Haier -86°C Personal ULT Freezer
 Energy-efficient HC refrigeration design. Secure and reliable. Intelligent Control.

# Microprocessor control system

- Microcomputer electronic thermostat, LED temperature display, display precision 0.1  $^{\circ}$ C , adjustable cabinet temperature set point -40  $^{\circ}$ C ~-86  $^{\circ}$ C.
- Cabinet temperature/voltage/ambient temperature checking are available.
- Multiple alarm functions: high temperature alarm, low temperature alarm, sensor fault alarm, power failure alarm, low battery power alarm, open door alarm and high ambient temperature alert.
- Sound and light alarm mode, attachable to remote alarm interface.
- Battery backup alarm function operates continuously for >24hr in the event of a power outage.
- · Standard configuration: RS485 port and USB interface.
- · Standard 5V power supply available for test equipment.
- · Optional IoT module.

### Superior thermal insulation performance

70mm super thick insulation layer design, aviation vacuum insulation material VIP, thickness of 25 mm or more, 4 layers of silicone seal, superior thermal insulation and energy saving effect.

#### **Porthole**

Portholes as standard, allows for independent testing of cabinet temperature.

#### Security lock

Standard door lock and padlock to ensure sample security and prevent unauthorised access.

# **USB** data storage

Capable of storing more than 15 years of data.
